ELISHA WALLEN, THE LONGHUNTER

The longhunters had their origins in the 18th Century. Men like Daniel Boone, Simon Kenton, and Davy Crockett blended Indian and pioneer culture in their dress and actions. They explored and helped settle half a continent. Their rifles and clothing were efficient, beautiful, and completely American. Elisha Wallen was such a man. Jim Two Crows Wallen a possible descendent of Elisha Wallen (considered the very first longhunter by some historians) lets his audience experience Colonial history through artifacts, historically accurate clothing, while telling Elisha's compelling story.
