

Project: Hoop Game

Story: Gift of Speed

Materials: One piece of a 12" embroidery hoop, large feather, string, and a large bead about this size.

Directions: Glue end of feather in bead and let dry. Weave string around hoop, leaving fairly large openings. You may have to glue the string in place.

To play: Hang hoop from tree, or ceiling. Make a mark about 10' back from hoop and let children try to throw feather (bead end first) through the hoop. Assign point values for different spaces in the hoop.
